## Topics to be RETIRED

The following topics are no longer being maintained by our topic editing team. Topics may be retired for several reasons. The most common reasons include:

- The medications have been either discontinued or removed from market.
- The topic is identical to another topic.
- The lessons are no longer referenced by procedures.

### What to expect:

When TopicUpdate.exe is run, it will retire topics from your live database if the topics meet all of the following conditions:

- The topic originated from LOGICARE Patient Instructions.
- The topic has NOT been edited by the customer.
- The topic's headings no longer exist in samples.
- The topic was not used in an instruction in the last 12 months.

**RETIRED Adult Topics**
